

What the *Anker* will do!

A brief instruction showing 480 patterns and illustrating the versatility of the "Anker" Fancy Stitch Device

ANKER-WERKE AG. BIELEFELD

Anker

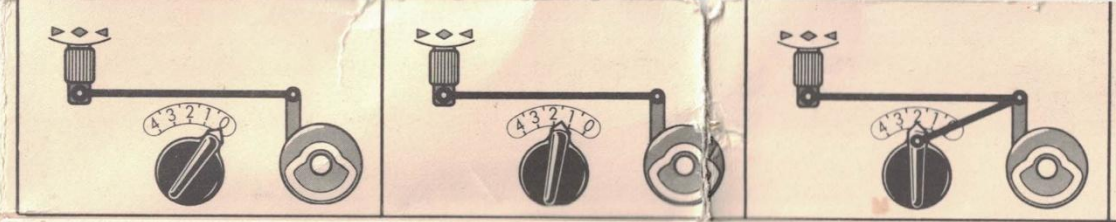

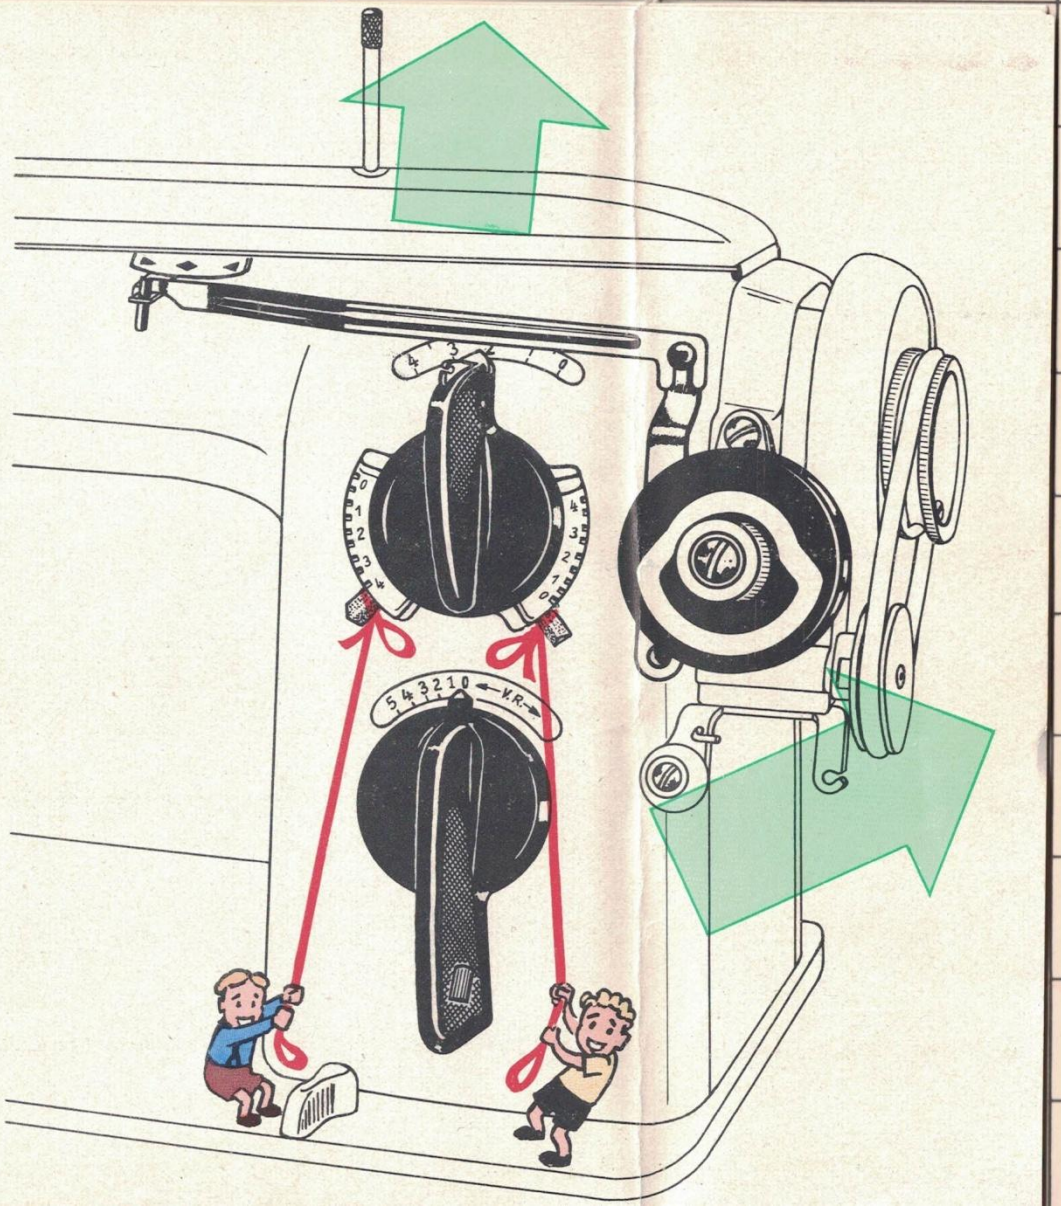

When using chart bar mark this accordingly but when you use both bars pay no attention to it

Before starting fancy stitches get a nice satin stitch

selecting
setting
embroidering automatically
is like child's play

A B C

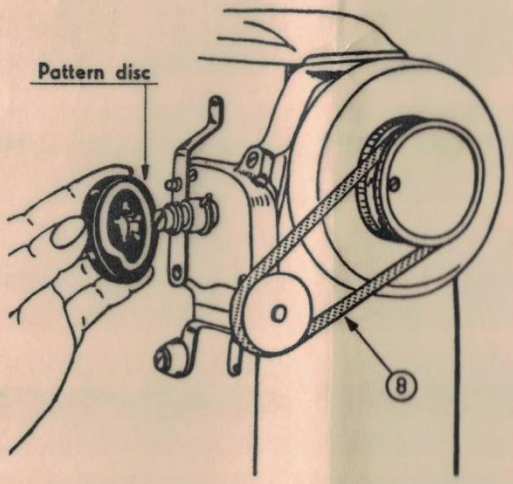

Zig-Zag Regulator automatically controlled (ill. II)

Insert **short connecting lever** 9. Stop levers 10 and 11 must stand right at the bottom and show on "4" and "0".
The **deflection lever** 12 is pulled out towards the operator and should be set in the middle when selecting patterns under A, whilst for B patterns it is to be shifted to the right and for C patterns to the left.

At the left of this the accessories are stated necessary for the patterns of the **horizontal rows** (for example embroidery foot PS, needle 16 x 87 or twin needle No. 80, 1,5 mm, 1 to 3 coloured fancy threads, ornamenting lace).

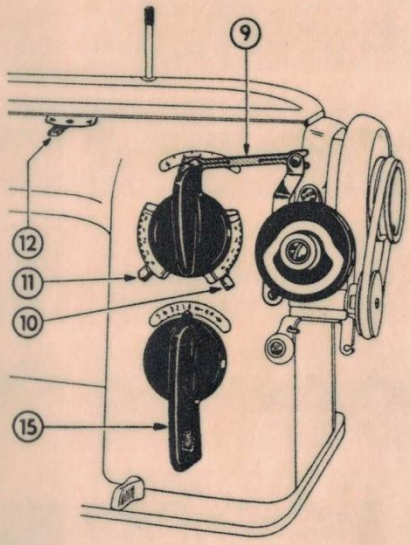

Insert the **twin needle** in the same way as the ordinary one with the long grooves to the front. The needle distance should not exceed 1,5 mm as otherwise the needles hit the needle plate when stitching.

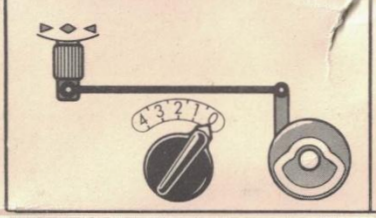

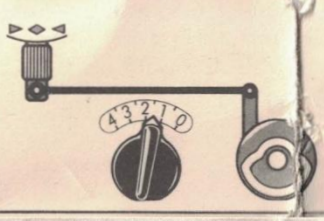

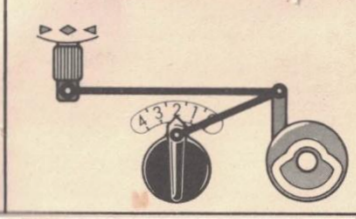

ill. I

Fit on the selected pattern disc (ill. I) and put on driving belt 8 (ill. I).

D E F

Deflection Lever automatically controlled (ill. III)

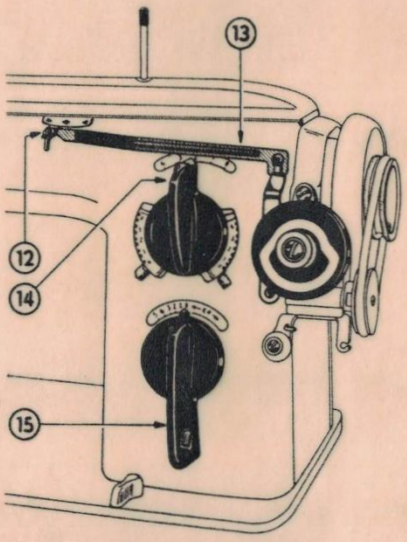

The **deflection lever 12** is pushed into the machine until the handle gives free a little borehole in the lever. The **long connecting lever 13** is inserted. The **zig-zag regulator 14** must be set on "0" for patterns of column D and on "1½" for those of E.

Zig-Zag Regulator and Deflection Lever automatically controlled.

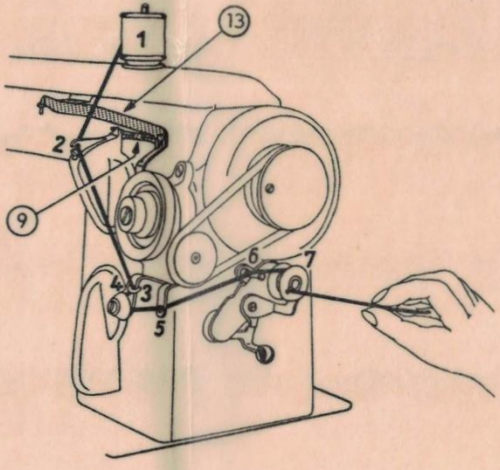

For the patterns of column F the short and long connecting levers 9 and 13 are both inserted (ill. IV).

At the right of this the length of stitch is stated necessary for the horizontal pattern rows. If the stitch length regulator 15 is set very near to "0" the stitches lie "stitch on stitch".

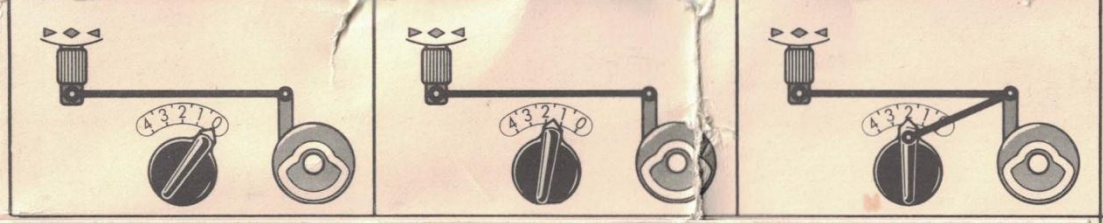

ill. III

ill. IV

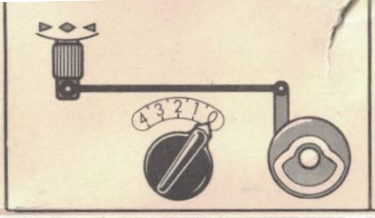

The figures 1 to 7 in ill. IV show the sequence in threading up for winding the bobbin.
